

Karan Tank

Security Engineer | Advanced Security Response Team (ASRT)

6472989129 | karantank.csi@gmail.com | [Linkedin: Karan-Tank](#) | [Credly: Karan-Tank](#)

Security Engineer with deep expertise in **threat detection, incident response, and application security**. Proven record in automating workflows, mitigating DDoS/bot attacks, and leading cross-functional teams. Seeking a **senior role** to drive security innovation and mentor future leaders.

Work Experience

Thales (formerly Imperva) - Security Engineer

Jan 2024 - Present

- Spearheaded comprehensive application security initiatives, integrating cutting-edge measures such as **Web Application Firewall (WAF)** and **advanced bot protection** to fortify against evolving cyber threats.
- **Automated security testing workflows** by developing a unified script to test diverse payloads, boosting testing **efficiency by 60%** and accelerating vulnerability identification and remediation cycles.
- Led Distributed **Denial of Service (DDoS)** protection efforts, establishing protocols and measures to mitigate the impact of malicious attacks on organizational assets.
- Generated detailed **Root Cause Analysis (RCA) reports** for multiple customers post-incident, enabling effective resolution and contributing to a **25% increase in customer retention**.
- Utilized **Tableau** for **traffic analysis** and created rules to mitigate bot traffic in customer environments, ensuring enhanced operational security.
- **Trained and mentored interns**, resulting in a **90% conversion rate to full-time positions**, thereby strengthening team capacity and fostering talent development within the organization.

Imperva - SOC Engineer

Jan 2024 - July 2024

- Implemented effective strategies for **bots detection and management**, specializing in advanced bot protection and **account takeover prevention** to safeguard critical systems and data.
- Analyzed **network traffic patterns**, utilizing advanced techniques to identify and respond to potential security incidents, contributing to a secure operational environment.
- Provided services across **OSI model layers 3/4 and layer 7**, delivering comprehensive security solutions and ensuring a resilient defense against threats at different network layers.
- Produced **detailed reports on bot activity trends, attack techniques, and incident outcomes** for internal review and strategic planning.

SecureOps - Senior Security Analyst (SOC) II

May 2023 - Dec 2023

- Conducted **advanced analysis and triage** tasks across diverse IT infrastructure, including endpoints, servers, and network components.
- **Led proactive security investigations** and comprehensive searches within client environments to swiftly detect and respond to malicious activities.
- Coordinated and executed **incident investigations** with in-depth analysis to identify and respond to detected threats promptly.
- Demonstrated a comprehensive grasp of the **MITRE ATT&CK framework**, effectively mapping client use cases to relevant tactics and techniques for enhanced security.
- Acted as an **expert resource** in the analysis and resolution of security incidents.

- Scoped customer security incidents to precisely understand their magnitude and potential impact.

SecureOps - Security Analyst (SOC) I

May 2022 - April 2023

- Proactively engaged in **Threat Hunting activities** on client networks to detect, isolate, and offer strategic recommendations to mitigate threats effectively and Assessed logs and model threats.
- Skillfully identified and understood **indicators of attack and compromise** within alerts by meticulous data analysis and thorough review of investigation notes.
- Conducted thorough analysis, review, and provided raw log data to gain deeper insights into **security escalations** through SIEM.
- Demonstrated **strong communication skills**, both orally and in writing, for clear and efficient collaboration with system and network administrators, systems users, and managers.

Vox Mobile - Technical Support Specialist

Jan 2021 – Nov 2021

- **End-User Support Excellence:** Delivered comprehensive technical and mobility support through calls and emails, utilizing a range of tools including ServiceNow, vFire, Citrix Workspace and Vox Mobile's knowledge base support center tools.
- **Device Management and Procurement:** Efficiently managed devices on BlackBerry UEM, VMware Workspace ONE, and Microsoft Intune MDM servers, while overseeing user procurement requests via Vox Mobile's dedicated channel and Telus IQ portal.

Corporation of City of Brampton - Information Security Analyst

Jan 2020 – April 2020

- **Enhanced Workflow Efficiency:** Implemented PowerShell automation to streamline workflow processes, optimizing operational efficiency.
- **Effective User Management:** Managed user onboarding and offboarding procedures, ensuring security and data protection through Active Directory oversight and assessments.

Certifications

• SANS GPEN: GIAC Certified Penetration Tester (SEC 560) <i>[In Progress]</i>	Expected	Oct 2025
• eLearnSecurity: Professional Penetration Tester (eCPPTv3)		Feb 2025
• TCMSecurity: Practical Web Application Security and Testing		Oct 2023
• TryHackMe: Junior Penetration Tester (THM JPT)		Jul 2023
• SANS GCIH: GIAC Certified Incident Handler (SEC 504)		Jan 2023
• SANS GSEC: GIAC Certified Security Essentials Certification (SEC 401)		Oct 2022
• SANS GFACT: GIAC Foundational Cybersecurity Technologies (SEC 275)		Aug 2022
• CompTIA Security+		Apr 2022
• Ec-Council CHFI: Certified Computer Hacking Forensic Investigator		Jan 2022

Education and Training

Toronto Metropolitan University - Advanced Cyber Education

Jul 2025 – Oct 2025

Toronto Metropolitan University - Accelerated Cybersecurity Training Program

Jul 2022 – Jan 2023

NPower Canada - Bootcamp: Junior QA and Security Analyst Program

Jan 2022 – Apr 2022

Fleming College - Advanced Diploma: Computer Security and Investigations

Jan 2018 – Apr 2020
